

MICHIGAN SUGARBEET REACH

Research & Education Advisory Council

REACH Sugarbeet Winter Grower Meetings

WHAT ❖

The REACH Committee invites you to attend one or more of the sugarbeet grower research update programs listed below. The 2010 research conducted by Michigan Sugar Company and Sugarbeet Advancement will be presented at these programs. The research will include Rhizoctonia/Leaf Spot control, nutrient management that includes nitrogen, starter fertilizer and micronutrients. Other research presented will be planting and harvest date research and ways to reach our goal of 19% sugar company average. Latest campaign updates will be included.

Pesticide certification and CCA credits are pending approval.
