### ***Summary:***

Weather INnovations Incorporated (WIN) is seeking a Service Technician to maintain its extensive weather monitoring network across rural Saskatchewan. WIN operates monitoring equipment in order to deliver programs and products to clients. The Service Technician will be responsible for the proper operation of weather stations and related components along with performing testing, repair, and diagnostics of equipment. This position is based out of central Saskatchewan and will require extensive travel (vehicle supplied), including overnight trips within Saskatchewan. Salary will be based on qualifications.

### ***Key Accountabilities:***

- Responsible for the repair, maintenance and installation of remote weather stations
- Repair, diagnostic testing, and calibration of sensors, electronics, and communication equipment
- Being the main contact person for site cooperators

### ***Skills and Qualifications:***

- Ability to work independently to coordinate workload and respond to competing priorities
- Excellent problem solving skills and willingness to learn
- Strong understanding and knowledge of electronics
- Basic knowledge of computer networks, IT systems, and TCP/IP is important
- Proficient use of the Microsoft Suite (Word, Excel, Outlook)
- Good interpersonal and communication skills
- Background with environmental monitoring and data acquisition equipment is beneficial
- Background or knowledge of agriculture would be an asset
- Availability to travel extensively throughout Saskatchewan, including overnight trips
- Valid and clean driving record
